EDUCATION

GLA University

Bachelor of Technology in Computer Science

Mathura, India

2022 – 2026

EXPERIENCE

Web Development Intern

July 2025 – September 2025

BAOIAM Innovations Pvt. Ltd.

Mathura, India

- Architected initial project structure and authentication system for company's dating application, including database schema design and auth flow implementation.
- Developed responsive frontend components for e-commerce platform using React.js, including user profile pages, help center, and homepage carousel with focus on mobile-first design.
- Refactored and debugged existing codebase to improve component reusability and fix UI/UX issues across multiple pages.

PROJECTS

FONA - Flow Oriented Notes Application | *Next.js, Supabase, EditorJS, Prisma, WXT*

- Built a note-taking application that maintains user flow while reading documentation or research papers, eliminating context switching with automatic text formatting management.
- Developed browser extensions for Firefox and Chrome using WXT framework with injectable UI for instant note capture and sync with web notes.
- link: fona.meet-jain.in

SOA | *TypeScript, Handlebars, Node.js*

- Created a CLI tool that adds authentication to frameworks in seconds with dynamic configuration for auth providers, databases, ORMs, and plugins.
- Supports Next.js (App Router and Pages Router) and React with providers including Better Auth, Clerk, and Supabase.
- Includes SOA-UI pack with built-in components, hooks, and pre-created authentication pages. Architected for multi-framework extensibility.

OPEN SOURCE CONTRIBUTIONS

Rocket Chat - Quick Replies App

January 2025 – Present

Contributor

Remote

- Enhanced functionality and user experience. PRs: [#32](#), [#44](#)

Monochromate Browser Extension

January 2025

Contributor

Remote

- Added image filtering based on MIME type and temporary grayscale filter disable feature. PRs: [#39](#), [#38](#)

TECHNICAL WRITING

Code Gazette - Tech Blog

2025

code-gazette.meet-jain.in

Remote

- Authored comprehensive blog post on gRPC architecture, benefits, and implementation in microservice systems.

ACHIEVEMENTS

Build with India

March 2025

Finalist

Google

- Selected as finalist competing against 25,000+ participants. Presented Baymax healthcare assistant robot.

CodeClash 2.0

June 2025

Third Runner-up

Google

- Third runner-up. Presented Baymax with emotion detection and vital monitoring capabilities.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript

Frameworks & Libraries: React, Next.js, Prisma, tRPC, GraphQL, gRPC

Tools & Technologies: Git, Docker, Kubernetes, PostgreSQL, Supabase, Nvim
